

ASSEMBLY INSTRUCTIONS

# Cot One, Cot One Long & Cot Max

Assembly instructions are printed on the reverse side of the cot fabric – so you'll never lose them!

Assemble the legs. Take note of the 'THIS SIDE UP' marking on the center section. Make sure both leg uprights are facing the same way as they locate onto the square center section.

Assemble the two long poles that form the cot sides.

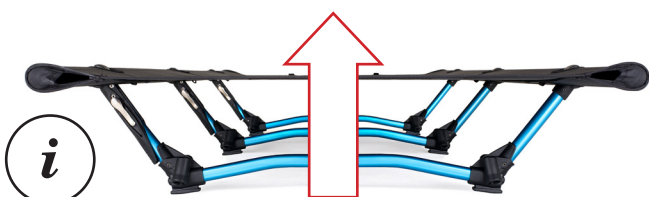

Slide each pole into the pockets along the side of the fabric. Ensure poles stay in pockets as they move past the semi-circular cut-outs.

The ends of each pole should sit inside the end pocket as shown.

With the cot on its side, place the leg end without the lever into the lower side pole. Then release and rotate the lever so it engages the upper pole. Apply downwards pressure to the lever until it locks in place. Repeat for other legs.

Ensure the black rings in the side poles sit into the grooves in the legs.

'THIS SIDE UP'

Leg frames should arch up in the middle.

The leg levers are locked and released via the silver side tabs. To release the legs, apply downwards pressure to the lever while pressing the silver tabs inwards.
